## ANNOUNCEMENT: NO PFAS IN OUR PRODUCTS

Dear Customers,

At INTERFLEX FOAMS, we believe in transparency, integrity, and the well-being of our customers. Today, we are thrilled to share a significant milestone – our commitment **to never having used Per- and Polyfluoroalkyl Substances (PFAS) in any of our sponge rubber products!**

Unlike some industries, our company has always prioritized the health and safety of our customers and the environment. We have diligently adhered to strict quality standards and consciously avoided the use of PFAS in our manufacturing processes.

Why is this important? PFAS, known as "forever chemicals," have raised concerns due to their persistence and potential adverse health effects. By never incorporating PFAS in our sponge rubbers, we ensure that our products are free from any associated risks, giving you peace of mind.

We remain fully committed to staying informed about emerging scientific research and regulatory guidelines, continuously striving to improve our practices and deliver sustainable solutions that make a positive impact.

Sincerely,

CYRIL BISBROUCK  
PRESIDENT

A handwritten signature in black ink, appearing to read "Bisbrouck", with a large, sweeping flourish extending from the end of the name.
